

	<b>Quality Policy</b>					
	AI-4.2.2-A1 rev 017	VP Quality	Shahar Kremer	CEO	Rami Bitensky	Date 21/05/17

**Arkai develops and supplies plastic based products, with smart, competitive and comprehensive solutions to automotive market customers, while striving continuously for excellence**

Quality is key parameter of why our customers choose ARKAL.

Therefore, we are following the quality policy as defined below:

1. Customers are the focus of everything we do.
2. We are continuously striving to meet or exceed our customer's expectations
3. Quality planning principles:
  - "First time quality" is the target for all our activities
  - Quality planning is based on risk thinking and "prevention at the source"
  - Advanced quality planning and risk analysis tools are in use:  
APQP / FMEA / Control plans / Statistical methods.
4. We are carrying out continuous improvement activities, in order to ensure product quality, processes efficiency, profitability and competitiveness
5. Our quality management system, at all locations, is committed to the requirements of:
  - 5.1. ISO 9001:2015 (quality management systems requirements)
  - 5.2. IATF 16949:2016 (particular application for the automotive production)
  - 5.3. ISO 14001:2015 (environment management systems requirements)
  - 5.4. Customer specific requirements as addressed by every and each customer
  - 5.5. Regulation with regards to Health & Safety, Environment, Employment and Product.
  - 5.6. Ethics is part of our culture with regards to preventing discrimination, employment rules, protecting human dignity, and acting honestly.
  - 5.7. The same are the expectations with our suppliers
